- 6. Models of the same series to be included in test:
-
-

- 7. For **selected items test**, please specify items to be tested:
-
-

By commissioning the above tests, the applicant accepts that a safety-related consultation will be carried out on the item to be tested.

The test principles of the Kuratorium für Waldarbeit und Forsttechnik e.V. (Board of Trustees for Forest Work and Technology) and the price list of KWF Services GmbH valid at the time of application are accepted.

Any liability of KWF Services GmbH and the organizations and persons involved in the test for damage to persons or property caused during the performance of the test is excluded to the extent that the exclusion is legally permissible. The applicant must therefore take out sufficient liability insurance. KWF Services GmbH may demand the presentation of proof of insurance.

KWF Services GmbH as well as the organizations and persons involved in the test are not liable for transport, fire and theft damage as well as for damage caused to the test object during the test. The applicant is therefore advised to take out appropriate insurance for the test item. KWF Services GmbH can demand the presentation of proof of insurance.

The test mark is only to be used for advertising purposes after the test has been positively completed; notices such as "under test" are also not permissible. Completion of the test requires a final report from KWF e.V. that is free of conditions.
